Week 4: Project: Observation and recording the weather

Observe the daily weather conditions over a period of two weeks. Your report should include the following: temperatures, cloud cover, precipitation, and wind. Make use of terms such as “very warm”, “warm”, “cold”, “cool”, “clouded”, “partly clouded”, “clean air”, “dry conditions”, “wet conditions”, and “windy”.

If you have access to measuring instruments such as a rain gauge and a thermometer, use it and share your results by means of graphs. Draw symbols for the given terms on a daily calendar.

Include your observations on wind directions and weather patterns during this period.

Study the influence of the weather on the daily living of people and comment on these observations.

Use the table on the next page to record your findings.
