b) Give a reason why you think so. (1)

QUESTION 4

(5 Marks)

4.1. Read the case study below, carefully, and answer the questions that follow.

Thandi carries water from the river

We have no taps in our village. We get our water from the river. Every morning I go to the river with my sister and a few other girls. We take our buckets with us. The large buckets hold 20 litres of water. The smaller buckets hold five of ten litres.

We fill the buckets at the river. Then we walk up the hill back to our village. We carry the buckets on our heads. They are heavy. Collecting and carrying water takes about two hours a day. Sometimes I am late for school. My family needs the water for cooking and washing. We also use water for the vegetables in the garden.

Thandi her sister and their friend fetch water from the river every morning

4.1.1. How does Thandi's family use the water?

(2)

4.1.2. There are six people in Thandi's family. Each person uses 10 litres of water a day. How many litres does the family need every day? Show your work out.

(2)

=

4.1.3. Thandi's village will soon be getting a communal tap in their village. Explain how Thandi's life will change if there is a tap near her house? (1)

QUESTION 5
