QUESTION 2		[5]	
	As a result of the flooding, thick black mud would coat the land on either side of the river. The thick black mud was very rich in nutrients and made the land very fertile and ideal for growing crops. Farmers dug water channels to carry water to their plots during long dry months. They also kept animals such as wild goats, cattle, and sheep for their meat. The majority of ancient Egyptians lived along the banks of the Nile. They used the water to water their crops, to drink and to wash. They used nets and	5	4

	spears to catch fish from the Nile River. They used the mud from the river to make pottery. The farmers would harvest the crops and trade it to other countries.
