(1)

6.3 Name two diseases that are spread by mosquitoes.

(2)

[4]

Question 7:

Read the passage and answer the questions that follow:

Water is an important basic need.

There is a great need for water, because there are so many people living in our country. Pollution and people who waste water, make this problem worse. All living things rely on water and will die without it.

We get our water from rivers, reservoirs and dams. We need clean water for drinking and cooking and to produce healthy food. Humans, animals and plants cannot use seawater, as it is too salty. Farms can only produce healthy crops if there is a good, clean water supply.

Detergents like washing powder and dishwashing liquid are made from chemicals. These chemicals cause dirt to attach itself to water. When we are done with our washing, this dirty water goes down the drain. This water must be cleaned before we can use it again. All the water that we drink and use in our houses, has been cleaned. They clean our water at the water purification plant.

(Source: Adapted and translated from Platinum Lewensvaardighene Gr 5)

7.1 Name **three ways** you can keep water clean.

(3)

7.2 Name **four ways** how you can save water.

(4)
