GRADE 11

FINAL EXAM 2022

PAPER 1

DURATION: 2 HOURS **MARKS: 100**

INSTRUCTIONS & INFORMATION

- This paper consists of:
  5 QUESTIONS AND 10 PRINTED PAGES (Including this cover page and 3 Annexures)
- Answer ALL questions.
- All calculations and steps must be shown clearly in ink.

- Number the answers correctly according to the numbering system used in this question paper.
- Round off **ALL** final answers appropriately according to the given context unless stated otherwise.
- An approved calculator (non-programmable and non-graphical) may be used, unless stated otherwise.
- Units of measurement must be indicated where applicable.
- Write neatly and legibly

QUESTION ONE [21 MARKS]

1.1 In the table below, there are two advertisements showing the prices of different food items over a period of one year. Both advertisements are for Keith's Supermarket but the advertisement on the left is for June 2010 and other on the right is for June 2011.

KEITH'S SUPERMARKET	PRICE (June 2010)	KEITH'S SUPERMARKET	PRICE (June 2011)	AMOUNT BY WHICH THE ITEM INCREASED
Brown bread	R8,00	Brown bread	R8,50	R0.50
Milk 2L	R18,00	Milk 2L	R18,99	R0.99
Polony 1kg	R21,39	Polony 1kg	R21,99	R0.60
Maize Meal (5kg)	R22,99	Maize Meal (5kg)	R23,49	**A**
Washing Powder (2kg)	R39,99	Washing Powder (2kg)	R39,99	R0.00
TOTAL	**B**	TOTAL	**C**	

1.1.1 Calculate the value of **A**, the amount by which the price of Maize Meal increased from 2010 to 2011. (2)

1.1.2. Calculate the values of **B** and **C**, the TOTALS for June 2010 and for June 2011. (4)

1.1.3. Use the values calculated in 1.1.2 to calculate the percentage increase of the total cost using the following formula:

$$\%\ Increase = \frac{New\ value - Old\ value}{Old\ value} \times 100$$ (2)

1.1.4. What is the term used to describe the percentage increase in the price of food items found in 1.1.3? (2)

1.2 Mr. Xulu lives in Brakpan and he travels to Pretoria for work from Monday to Friday. The distance from Brakpan to Pretoria is 55km.

1.2.1 If the running cost of Mr. Xulu's vehicle is R3.85/km, calculate how much it would cost him for a **return trip** for the week. (3)

1.2.2 His wife suggests that he uses the Gautrain to work and back. A one- way ticket between Brakpan and Pretoria costs R125. Calculate his weekly cost of going to and from work on the Gautrain. (2)

1.3. Bonny recorded Graaff Reinet's temperatures in degrees Celsius from Wednesday, 13th of September to Friday, 22nd of September 2017. Study the information below and answer the questions that follow.

Dates	13	14	15	16	17	18	19	20	21	22
Min.	8	8	11	7	7	9	12	12	12	12
Max.	25	21	26	17	19	23	29	28	26	27

1.3.1 Arrange the maximum (max.) temperatures in ascending order. (2)

1.3.2. Write down the minimum (lowest) value of the minimum (min) temperature. (2)

1.3.3. Define the term "mode" in the above context. (2)
[21]

QUESTION 2 [18 MARKS]

2.1. Mr. Jacob does his banking with First National Bank. The statement in **ANNEXURE A** was sent to Mr. Jacob at the end of November. An extract of the banking fees for his Smart Account is given in **ANNEXURE B**.

2.1.1 How many days does this statement cover and how many statements did Mr Jacob receive for this account? (2)

2.1.2 What is the **total** monthly account fee **and** service fee payable on this account? (2)

2.1.3 Calculate the total bank charges for the month of October. (2)

2.1.4 Show by calculations how R11.95 VAT was calculated. (3)

2.1.5 In December Mr. Jacob made the following transactions.

- 2 cash withdrawal of R600 at FNB ATM
- 1 deposit of R900 at the FNB ATM
- 1 deposit of R2 500 in the bank.

By referring to the fee structure table in **ANNEXURE B**, Calculate the total service fee for these transactions. (4)

2.2 Nombulelo works as an insurance broker with a basic salary of R13 860. She also gets a commission of 5% of the total sales. Given below is Nombulelo's pay slip for the month of April 2017.

Bluegrass Insurance Brokers			
	SALARY ADVICE		
EMPLOYEE NAME:	Nombulelo Khuzwayo	BANKING DETAILS CBA Bank LTD	
ADDRESS:	27 Drum Street Empangeni 3917	Branch code: 023465 Account number: 34130251208	
I.D Number:	84031545632188	Date: 30 April 2017	
	PAYMENT SUMMARY		
Earnings		**Deductions**	
Basic Salary	R13 860	PAYE	R1 953,27
Commission	R 2 800	UIF	R 166,60
Gross Earnings	R16 660	**Total deductions**	**R2 119,87**
Net pay			

2.2.1 What does the abbreviation "UIF" stand for? (2)

2.2.2 Nombulelo claims that she made a total sale of R56 000 for the month of April 2017. Verify whether her claim is valid. (3)

[18]

QUESTION 3 [20 MARKS]

The Grade 11 learners from RedKing Secondary School are fundraising for their 2023 Matric Dance by selling Sports T-Shirts. The School has allowed them to use the Store Room at a rental cost of R950 per month. The cost of making the Sports T- Shirt is R85. They are selling them at R180 each.

The formula for calculating the cost of the Sports T-Shirt is given as follows:

Cost = R950 + (R85 x Number of T-Shirts)

TABLE FOR COST AND INCOME FOR SPORTS T-SHIRTS

NO. OF SPORTS T-SHIRTS	0	10	20	30	40	50
COST OF SPORTS T- SHIRTS IN Rands	950	1800	2650	**B**	4350	5200
INCOME OF SPORTS T-SHIRTS IN Rands	0	**A**	3600	5400	7200	**C**

3.1 Write the formula for calculating the income for selling the Sports T-Shirts in the form:
I = ---------- x number of T-Shirts (2)

3.2 Calculate the missing values A, B and C from the table. (6)

3.3 A graph for the cost of the Sports T-Shirts is drawn in **ANNEXURE C**. On the same system of axes, draw the graph for Income. Indicate the break-even point with the letter X on the graph. (5)

3.4 Explain the concept of Break-Even, according to the given context? (2)

3.5 Mr Ladipo said that the Grade 11's will make more than R3 000 in profit if they sell 45 Sports T-Shirts. Verify, using calculations if he is correct? (5)

[20]

QUESTION 4 [20 MARKS]

Jack and his cousin Danny are on holiday in KwaZulu Natal. After the April floods the availability of water was a major problem. Residents were faced with higher costs and thus were finding new methods to save water. The municipality in the area released the table below for their water tariffs.

TABLE 1: Water Structure for eThekwini Municipality 2022-2023

Step	*Consumption (KL)*	*Tariff per K/L (excl. 15 %VAT)*
1	0 – 6	Free
2	> 6 – 10.5	15.98
3	> 10.5 – 20	18.75
4	> 20 – 35	21.24
5	> 35 – 50	24.78
6	> 50	25.65

4.1 In your opinion why does the municipality not charge for the first 6 Kl of water? (2)

4.2 Jack's pet dog drank 10.5 Kl of water during the summer, which step on the tariff table will he be charged for? (2)

4.3 Why does the tariff rates increase depending on the volume of water used? (2)

4.4 Jack and Danny were staying at their uncle's house. They used 38 Kl of water for the month. Their water bill came to R739.43. Their uncle said that they were overcharged. Verify whether their uncle is correct. (5)

4.5 State two possible ways a household can save water. (2)

4.6. Jack and Danny were returning home to Nashville in USA, they would have to sail on three ships to reach their final destination. Before the ship left Durban harbour, Captain Marshal paid R409.67 including VAT for water to be filled into drums. How many Kl's of water would the captain receive? (7)

[20]

QUESTION 5 [21 MARKS]

The learners in both 11B (11pupils) and 11C (10 pupils) were given a Maths Literacy test out of 100 marks. The results are as follows:

11B	32	41	50	57	45	36	22	61	57	38	57
11C	A	75	42	68	69	68	53	40	62	53	

5.1 Is the above data discrete or continuous? Explain. (2)

5.2 Calculate the mean mark for 11B. (2)

5.3 The mean for 11C is 62. Calculate the missing value A. (3)

5.4 The median mark for 11B is 45. Calculate the median mark for 11C. (3)

5.5 What is the modal mark for 11C? (2)

5.6 In your opinion, which class performed better? Give TWO reasons to justify your opinion. (3)

5.7 The educator states that less than 40% of learners scored below 50 in both classes combined. Verify using calculations, if this is correct. (3)

5.8 What is the probability of randomly choosing a learner that scored above 50 in the 11B class? Give your answer as a percentage. (3)

[21]

TOTAL MARKS = 100
